

Your bonsai community, in your pocket

I built **Tiny Tree Club** for our club: keep a record of every tree you own, log the care you give it, and see what everyone else is working on. Free, no ads, and Badger Bonsai is the founding club.

▲ Your collection

Every tree with photos, species and notes.

▲ Club feed

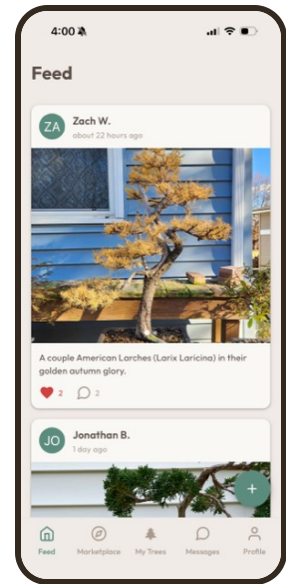

See what other members are growing.

▲ Care log

Watering, feeding, repotting – dated and kept.

▲ Buy & sell

List trees for sale inside the club.

ON IPHONE OR IPAD

It's live today

Point your camera at the code, or search **Tiny Tree Club** in the App Store. Sign in with your email – no password to remember.

ON ANDROID

I need 12 testers

Google won't let me publish to the Play Store until **12 people have used the app for 14 days straight**. If you carry an Android phone, you are the thing standing between this app and launch. It takes two minutes to start.

- 1 **Tell me your Gmail address** – tonight, or email hello@tinytreeclub.com. I have to add you to the list by hand before the code beside this will open for you.
- 2 **Scan the code**, tap "Become a tester", then install from the Play Store.
- 3 **Open it every few days for two weeks**. Google checks that testers actually use the app – an install that sits untouched doesn't count.
